Projects

Pijns   GitHub
Description: A social networking application for mobile
- ⇒ Built with React Native and Firebase
- ⇒ Integrates Facebook API to create accounts and pull user information
- ⇒ Uses a combination of React Redux and Firebase listeners to update data in real-time

Eatery   GitHub
Description: A full stack web application inspired by Yelp
- ⇒ Users register an account, lookup restaurants or cuisines, leave comments, write reviews, and score restaurants
- ⇒ Delivers full backend and frontend development featuring BCrypt password encryption, Google Maps integration, and search bar

Wall-E Ball   live site | GitHub
Description: A pure JavaScript game inspired by Doodle Jump
- ⇒ Built with JavaScript Canvas and requestAnimationFrame

Experience

Application Developer
Lifion by ADP   May 2018 – present
- ⇒ Help architect and build large scale HR applications for companies to manage their employees
- ⇒ Find creative ways to make complex tasks simple for companies. Eg, maintaining thousands of employee records for Federal reporting requirements.
- ⇒ Engineer both backend and frontend logic and craft UX designs to maximize efficiency and performance and allow for the best user experience possible.

Licensed Relationship Manager
Citizens Bank / Key Bank   Sept 2014 – Sept 2017
- ⇒ Achieved regional top five banker status by third quarter of being hired and earned Series 6, 63, and 65 within four months of being promoted

Program Director / Pastor
Cornerstone Church of Boston   Sept 2008 – May 2015
- ⇒ Cast vision and created structures for how to recruit volunteers and the process they should go through to learn team goals and tasks, develop the right character and mindset, and identify their fit for the team

Technical Skills

Ruby / Ruby on Rails
HTML5 / Canvas
